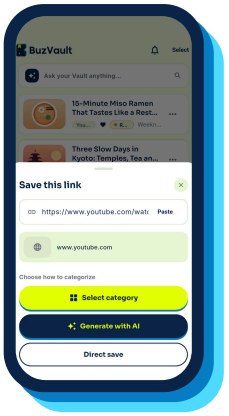
Recipes · Free guide

Build a recipe vault

From food reels to a weekly menu you actually cook from.

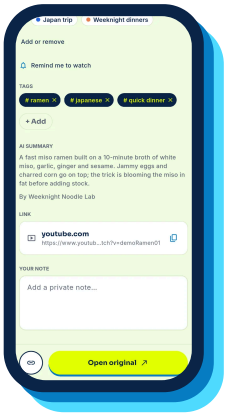
Save every recipe to one place

- Reels, YouTube videos and food blogs: tap Share → BuzVault.
- BuzVault suggests the Recipes category for you.



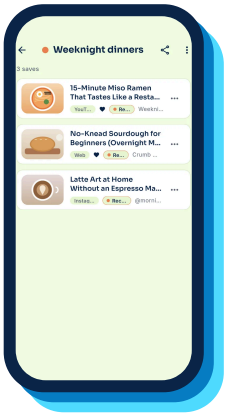
Add the word you will search for

- Add a note or tag: “paneer”, “no oven”, “kids liked it”, “15 min”.
- Search finds notes and tags as well as titles.



Create meal collections

- Weeknight dinners — under 30 minutes.
- Weekend projects — slow and special.
- Guests coming — dishes you trust.



Plan the week on Sunday

- Make a “This week” collection and add four or five recipes.
- Set a reminder on the one you will cook first.

Share the menu

- Tap Share on a collection and send one link to the family.
- They see titles and links only — never your notes. Stop sharing any time.

Keep it small and good

- After cooking, add a note: “made it — more chilli”.
- Delete what you will never make.
