

Shopping wishlist without regret

Save products, wait for the right moment, compare before you buy.

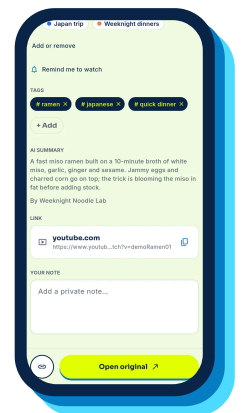

Save, do not buy — yet

- See something you want? Share it to BuzVault instead of buying on impulse.
- It lands in Shopping with its picture and link.

Add the price and why you want it

- Add a note: "₹2,499 today", "for running", "after payday".

Set a reminder for sale day

- Open the save → Remind me → this weekend or next week.
- If you still want it when the reminder comes, it is probably worth it.

Compare in one place

- Make a collection for the decision: "New headphones".
- Put the options side by side and delete the ones you rule out.

Share for a second opinion

- Send the collection link to a friend before you buy.
